

**Crown® Paint Thinner (Substitute) CARB** - CL.LVPTSCB and CL.PTSCB - January 19, 2024**Description**

CROWN® VOC Compliant Paint Thinner is a multi-purpose cleaner which cleans paint tools and equipment like traditional paint thinner. Crown® VOC Compliant Paint Thinner also removes wet solvent-based coatings from brushes & rollers and can be used as a spray gun and spray gun parts cleaner for oil-based products.

Prominent Features

- Multi-purpose solvent.
- Cleans paint tools and equipment like traditional paint thinner.
- Very slow to evaporate.
- Low odor for ease of use.
- Removes wet solvent-based coatings from brushes & rollers.
- Spray gun and parts cleaner for oil-based products.
- VOC Compliant.

Uses

- Cleaner for brushes & rollers and spray equipment for oil-based products.

Limitations

Not intended to be used as a thinner.

Application

For cleaning brushes, place brush in metal can with enough cleaner to cover bristles. Do not use a plastic container. Soak until paint is softened. Carefully scrub the brush against the inside of the metal container and work in fresh cleaner as needed. Rinse thoroughly with warm tap water (DO NOT USE HOT WATER) and add a mild soap if necessary to restore brush luster. Repeat cleaning steps if necessary. Dry brush with clean rags and store brush flat on its side in paper. For fresh paint, eliminate soaking step. For cleaning rollers with fresh paint, pour cleaner into clean roller tray, saturating roller. Remove excess cleaner by rolling on ribbed area of tray. Remove roller from frame, rinse thoroughly with tap water. Stand on end to dry. Soaking brushes for extended periods of time will damage the bristles. Carefully read all cautions and instructions before use. Protect hands with solvent-resistant gloves, and eyes with safety glasses. Open can slowly to relieve pressure.

Disposal

Contains organic solvents which may cause adverse effects to the environment if disposed of improperly. Place empty containers in normal refuse for disposal. Contact your local sanitation department or household hazardous waste coordinator for information concerning possible reuse or disposal of unused solvent-containing products.

Storage

Store in dry, cool, well-ventilated areas away from strong oxidizing agents, strong reducing agents, strong acids, alkalis, acid anhydrides, food, and drink. Keep away from heat and ignition sources. Transfer only to approved containers having correct labeling. Keep containers tightly closed when not in use. Protect containers against physical damage. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Containers are hazardous when empty as they contain product residue. Do not cut, drill, weld, braze, solder grind or perform similar operations on or near empty containers. Use appropriate containment to avoid environmental contamination. Ventilate closed areas. Do not take internally. Keep out of reach of children.

Packaging

1 Quart – 6 per case - 'F' style plastic container
1 Gallon – 4 per case - 'F' style plastic container
2.5 Gallon – 2 per case - 'F' style plastic container
5 Gallon – Single units - metal pail container
